Is this a "Fast & Focused" Search Request? (Circle One) YES NO

A "Fast & Focused" Search is completed in 2-3 hours (maximum). The search must be on a very specific topic and meet certain criteria. The criteria are posted in EIC2100 and on the EIC2100 NPL Web Page at <http://ptoweb/patents/stic/stic-tc2100.htm>.

What is the topic, novelty, motivation, utility, or other specific details defining the desired focus of this search? Please include the concepts, synonyms, keywords, acronyms, definitions, strategies, and anything else that helps to describe the topic. Please attach a copy of the abstract, background, brief summary, pertinent claims and any citations of relevant art you have found.

Topic: Electronic Book (e-book)

Novelty: Allowing a viewer(client) to ^(store) download and view electronic books at a client machine.

Keywords: File server, electronic book, controller and viewer(client)

Please see claim ~~24~~ 23 attached.

... Design intervention in this area could come in the form of
providing standard templates for screen -friendly Acrobat message files.
During the 'Acrobat in Publishing' conference, I demonstrated an Acrobat
memo created with...

...want to consider documents that are designed from the start for viewing
at a computer monitor. Acrobat 's 'added value' electronic document
features such as Links, Bookmarks and Search are good reasons why
publishers could consider an Acrobat on - line document as potentially
very different from and perhaps more valuable than a printed document.
How...

...vertically, and 25 horizontally. So, on a 640 x 480 display, the space
left to view an Acrobat document is 615 x 391 pixels. This works out at
a ratio of 1:1...

...is defined as 1/72 of an inch, is mapped to a pixel on the screen .

If an Acrobat publisher considers Bookmarks essential to the
navigation of a document, this may affect the design...colour fills. These
colours displayed beautifully sharp and clear in my FrameMaker document
but, when viewed in a PDF document created with Acrobat Distiller, they
were rendered with dither patterns, degrading image sharpness. By...be
avoided to boost screen performance.

Navigation: The provision of hot links between pages and views in an
Acrobat document, and how to represent links to screen, is one area where
design ingenuity can...greyscale pictures for a printed document, but swap
in lower-resolution colour versions for an Acrobat screen document.

Tables, at which FrameMaker excels, also benefit from the generic
approach to formatting. You...

Electronic books

Reynolds, Louis R; Derose, Steven J

Byte v. 17 (June '92) p. 263-8

DOCUMENT TYPE: Feature Article ISSN: 0360-5280 LANGUAGE: English

RECORD STATUS: Corrected or revised record

ABSTRACT: Part of a cover story that explores the importance of computer technology in distributing information. Although first considered decades ago, electronic books will be made possible by new combinations of powerful processors, high density storage media, and interchangeable and processible representations of text, graphics, and multimedia documents. Discussed are the economic advantages of electronic books; the development of the concepts of hypertext and hypermedia; the design characteristics of electronic text systems; the factors that have held electronic books back in development; industrial applications of electronic documentation; the authoring system, conversion tools, and delivery engine components of an **electronic book** ; the DynaText system for **online** delivery of **electronic books** ; and the importance of document representation standardization, which was formalized in 1986 and is called the Standard Generalized Markup Language.

DESCRIPTORS: Business expert systems; Technology transfer; Electronic books; Hypertext systems;

Four PostScript clones

Heid, Jim

Macworld , October 1, 1989 , v6 n10 p124-127, 4 Pages

ISSN: 0741-8647

Languages: English

Document Type: Hardware Review

Grade (of Product Reviewed): d

Hardware/Software Compatibility: Macintosh

Geographic Location: United States

Presents an unfavorable review of the Qume CrystalPrint Publisher (\$4,499), a PostScript clone laser printer from Qume Corp. of Milpitas, CA (800, 408). Says its setup is straightforward, output quality is excellent, and the black areas are printed beautifully; but the paper tray only holds 100 sheets, doesn't have a manual feed slot for envelopes or non-standard paper. It can not **download Adobe** fonts and is expensive. Notes that its performance was good on all tests but the document test, where ``it crashed into the wall.'' Mentions three other PostScript clones: the Abaton QuickStep (\$4,495), the Jasmine DirectPoint (about \$3,499), and the La Cie Panther PDX (about \$3,499). Notes that in general all four are moderately priced and quick. (lj)

The electronic bookmobile

Alloway, Catherine Suyak

Electronic Library, The , April 1, 1990 , v8 n2 pp100-106, 7 Pages

ISSN: 0264-0473

Languages: English

Document Type: Feature Articles and News

Geographic Location: United States; Great Britain

A paper examining the viability of electronic bookmobiles, which are technology-enhanced implementations of the bookmobiles that have been an integral part of public libraries. Details the different advances in the mobile-telecommunications technology that can make **online** systems applicable to **electronic bookmobiles**, as well as the the problems that confront libraries wishing to develop such bookmobiles. Includes an abstract, a list of references, and a brief author profile. (asl)

Books online: visions, plans, and perspectives for electronic text

Basch, Reva

Online , July 1, 1991 , v15 n4 p13-23, 11 Page(s)

ISSN: 0146-5422

Languages: English

Document Type: Feature Articles and News

Geographic Location: United States

Discusses implications in the future proliferation of **online electronic books** . Covers issues of copyright and royalties, the setting of media standards, perhaps based on ASCII, scanning and production of texts, and current availability of documents on BITNET. Also discusses advantages of reading electronic texts (e-texts), such as random access and temporary highlighting and marginal notes, as well as current difficulties in e-text quality compared to hardcopy material. Focuses attention on large-scale availability of information using electronic means. Includes five photographs. (jo)

CheckList 2.0 -- PageMaker and PostScript file scanner

Roth, Steve

Macworld , February 1, 1992 , v9 n2 p289, 1 Page(s)

ISSN: 0741-8647

Company Name: ElseWhere

Product Name: CheckList

Languages: English

Document Type: Software Review

Grade (of Product Reviewed): c

Hardware/Software Compatibility: Macintosh Plus

Geographic Location: United States

Presents a mixed review of CheckList 2.0 (\$179.95), a PageMaker and PostScript file scanner from ElseWhere Corp. (206). Runs on Macintosh Plus machines. Says CheckList can print and save CheckList reports, offers system-wide font searching, can determine fonts from PostScript files, lists font names and ID conflicts, allows viewing fonts available on a printer, scans **PostScript** files, can **download PostScript** files to a printer, and allows adding notes to a PageMaker or PostScript file; but has some bugs, scans one file at a time, and cannot scan some applications' files unless saved as EPS files. Includes a product summary. (tbc)

Descriptors: Utility Program; Disk Files; Software Review; Macintosh;
Upgrade

Self-fulfilling prophet -- Online University bookstore features
electronic texts

Huttig, J W

PC Today , August 1, 1993 , v7 n8 p30-33, 3 Page(s)

ISSN: 1040-6484

Company Name: Connected Education

Product Name: Connected Editions

Languages: English

Document Type: Feature Articles and News

Geographic Location: United States

Discusses Connected Education, an online university offered through the New School for Social Research in New York City and how it has embraced electronic publishing as a major means of providing learning materials. Through Connected Editions, students can acquire ''floppyback books'' which, along with online lectures and email communications, are the primary materials for the classes. Says the students can download information from the library, as well as submit questions to the instructor or submit homework via a modem. Reports that students can also go online to 'chat' with other students, or read and comment on papers submitted by classmates. Discusses the role of Hypertext in the electronic publishing operation. Notes that about 75 to 100 students, mostly professionals, are enrolled at any one time; and that both faculty and students are diverse, demographically and geographically. Contains one photo and one sidebars.

The Internet Bookstore opens for business: ' e - books ' transmitted
in 30 seconds; cost is 30 percent of the print price

LINK-UP , July 1, 1994 , v11 n4 p21, 1 Page(s)

ISSN: 0739-988X

Product Name: Internet Bookstore

Languages: English

Document Type: Feature Articles and News

Geographic Location: United States

Notes the opening of the Internet Bookstore, a service that transmits copyright-protected text-only versions of publishers' books and periodicals. Lists among participating publishers: Paramount Macmillan, McGraw-Hill Professional Publishing, Oxford University Press, Harvard Business School, Dearborn Financial Publishing, and the National Review. Notes that this commercial application of the Internet is not the first attempt to distribu equality, current publications, but is the first to attract a br range of major publishing houses. Explains that copyright is protected because of proprietary encryption that allows a copy o the book to be used only with the customer's personal decryption device provided by the Bookstore. Says a starter kit is \$29.95 including \$25 credit for purchases; information can be obtaine sending a blank e-mail to ebooks-info@access.digex.net. (DJP)

ABSTRACT: This is an improved-type camera of F90 marketed in September, 1992. Although it has almost the same appearance and design as the original F90, it has incorporated higher-speed and higher-precise AF, substantially increased photographing-data storage capacity of the main body, function setting by connection with an **electronic pocketbook**, a data- **transfer** function, etc.

This article describes a system developed to help individuals to read who are unable to handle books because of various disabilities. Discussed are the design strategy, costs, and the reactions of users to the prototypes. The system developed for this purpose is based on **transferring book** texts to **electronic** formats.

Journal Announcement: 71X0

Abstract: The expected forthcoming era of "paperless books", the computerized **electronic** fast **transmission** of books, magazines, etc., is the major topic of this paper. Its technology, application, benefits, and concerns are outlined for easing the information explosion problem engulfing all of us. Steps are discussed for evolving into common use during the next decade the computerized dissemination of information.

Patent Details:

Patent No	Kind	Lan Pg	Main IPC	Filing Notes
US 5404299	A	14	G06F-015/20	

Abstract (Basic): US 5404299 A

The concept dictionary management device stores fundamental concept **network** connection information which represents fundamental concept **network** connections among words stored in a concept dictionary, and first supplemental concept **network** connection information to be used for adding words to and deleting words from the concept **network** connections represented by the fundamental concept **network** connection information. A second supplemental concept dictionary stores second supplemental concept **network** connection information to be used only for personal use, to add one or more words to and delete one or more words from the concept **network** connections obtained as a result of an addition of a deletion of the words connection by using the first supplemental concept **network** connection information.

A concept dictionary **retrieval** portion **retrieves** a concept **network** connection including an input word from the fundamental concept dictionary data holding portion, from the first supplemental concept dictionary data holding portion and from the second supplemental concept dictionary data holding portion. An operation control portion **receives** concept **network** connection information, extracts a word from the **received network** connection information and outputs data indicating the extracted word to the concept dictionary **retrieval** portion as data indicating an input word.

USE/ADVANTAGE - Computerised dictionary system for managing concept dictionary in which words of **electronic dictionary** connected as **networks** e.g semantic **networks** .

Patent Details:

Patent No	Kind	Lan Pg	Main IPC	Filing Notes
US 5325483	A	21	G06F-003/12	

Abstract (Basic): US 5325483 A

A file station stores a number of images to be searched in the form of compressed data by coding, and at least one terminal station is connected to the file station via a **transmission** line. The file station includes a processor for decoding compressed image data read from an image file to restore an original image, an image processor for processing the restored image data such as extracting a partial area, and a coding processor for data-compressing the processed image data by coding.

When a user at the terminal station designates a search condition, display mode, and control information for image processing, the file station reads the images satisfying the search condition from the image file, and causes the searched images to be subjected to the image processing designated by the control information. The processed image data are **transmitted** to the terminal station in the form of compressed data by coding.

ADVANTAGE - Is capable of sequentially displaying specified partial areas at high speed.

ABSTRACT

PURPOSE: To completely **transmit** name card information regardless of a record length per item of data registered into an **electronic** pocket **book** by dividing the name card data for each address.

CONSTITUTION: When the character information read by a scanner 101 is **transmitted** to another information processor (**electronic** pocket **book**), a deciding means 102 decides whether plural addresses are included or not in the character information equivalent to a sheet of read name card. If so, a storage means 103 stores temporarily those addresses and the character information except the telephone numbers corresponding to the addresses. Then a **transmitting** means 104 **transmits** successively the addresses and their corresponding telephone numbers and the character information stored in the means 103 to the **electronic** pocket **book** as a set of name card information. Thus the character information is divided for each address and completely registered into the **electronic** pocket **book** .

ABSTRACT

PURPOSE: To automatically **transmit** the desired telephone number information by setting an **electronic** telephone number **book** to a recording/reproducing means to register the telephone number information to the corresponding originating **receiver** and then carrying out said telephone **book** to set it to the telephone terminal equipment of an optional area.

CONSTITUTION: A recording medium (**electronic** telephone **book**) for telephone number information is set for recording the telephone number information. An **electronic** telephone **book** **reader** /writer 23 is provided to reproduce and read the telephone number information together with a memory 22, a display part 25, an input part 24, a control part 21, and a telephone terminal equipment consisting of at least a telephone circuit. The memory 22 stores the information related to an exchange such as the type of the exchange stored in said terminal equipment, the toll numbers, the local numbers, etc. In an originating mode the **electronic** telephone **book** is set to the **reader** / writer 23 and the specific telephone number information is recompiled into the telephone number information consisting of the prescribed number of digits suited to the originating **received** from the terminal equipment via a prescribed route. Then an automatic dial outgoing operation is carried out through a telephone circuit.

ABSTRACT

PURPOSE: To realize the feeling of **retrieving** a familiar **book** on an **electronic** filing device by stereoscopically displaying the thickness-wise condition of a document overlapping a lot of pages and designating a content display page by matching a cursor or the like to the page overlapping display part.

CONSTITUTION: The reference document is graphically displayed in a spread state. In this case, the thickness-wise condition of the document overlapping a lot of pages is stereographically displayed. First of all, the objective page is displayed and when a page turn operation switch 4 is pushed, the pages of the document on the display are turned one by one in a designated direction. When the page turn operation switch 4 is continuously pushed, a continuous page turn mode is set and the pages of the document on the display are automatically and successively turned at decided speed so as to check the contents of the respective pages in a short time. When a jump command is applied while matching a cursor 10 to the suitable position of the page overlapping display part, the pages are totally turned at the same time

Abstract (Basic): EP 390611 A

The **electronic book** comprises a memory to store, in the form of separate pages, pieces of information such as sentences each composed of characters and a device to read the pieces of information. Each page of pieces of information thus read are displayed and a key indicates the display of a subsequent page. A second key indicates the return to the preceding page. A third key indicates the display of the contents of the stored information. Access is permitted to desired page of information in the memory to display pages on after another like turning the pages of a book.

A fourth key puts a cursor on a selected position in the displayed page and fifth key locates the selected position. A sixth key underlines the part of the page from the selected starting position to a desired ending position, the position of the underline thus drawn being stored in the memory.

ADVANTAGE - Eliminates need to print displayed contents. (13pp
Dwg.No.1/9

Title Terms: ELECTRONIC; BOOK; STORAGE; MEMORY; TIME; PERMIT; AUTOMATIC;
VISUAL; PRESENT; SUBSEQUENT; PAGE; PREDETERMINED; LENGTH; TIME; PUSH;
FIRST; KEY

Derwent Class: T01; W04

International Patent Class (Main): G06F-013/00

International Patent Class (Additional): G06F-015/02

File Segment: EPI
